

SOFTWARE SOLUTIONS DIAMS iQ overview

DIAMS iQ is a web-enabled IP management system developed in close collaboration with IP experts. It features modular setup, flexible docketing functionalities, powerful reporting, support for Microsoft Word mail merge and worldwide country law updates.

DIAMS iQ is Dennemeyer's latest innovation in the software solutions arena. This web-enabled IP software has the advantages of both a client-server solution and a web-based application, offering secure, remote access from any location in a unique, flexible and powerful way - powered by Microsoft's Smart Client Technology.

Top-notch security and compatibility

- Define distinct access roles and security types with customizable levels of permissions for field groups.
- Proven expertise in efficiently importing portfolios from almost any other IP management system.
- Extended compatibility with other systems, allowing optimum flexibility and configuration options.

Powerful reporting

- Schedule reports and send them automatically via e-mail. Receive reports quarterly or periodically, thanks to a variety of reporting options.
- Background report generation. Don't wait for the report to generate. Click to create a report and continue your work. When the report is done, a pop-up will appear.
- Four main types of reporting: MS Excel (XML), PDF, RTF and HTML, Mail Merge, and personalized lists.
- Special layouts or statistics with built-in or custom reports, including integrated standard PTO forms.

Comprehensive document management

- Built-in Document Management System (DMS)
- Upload and attach electronic documents, files and e-mails to any type of record with an easy to use drag and drop interface.

Swift and reliable search

- Powerful and intuitive search, combined with unique Unicode support (e.g. for Asian, Cyrillic, Hebrew characters) and a multilingual interface.
- Advanced search allows searching for any field, combining search results and saving search criteria, which includes "null" searches for auditing.

DIAMS iQ's modules can be deployed separately or as an all-encompassing solution, resulting in a comprehensive platform that seamlessly integrates invention, prosecution, licensing, and other matters. DIAMS iQ is highly configurable, multilingual and easy to use.

Trademark Module

Maintain your trademark portfolio easily. From a trademark profile, you can create all subsequent applications with the Trademark Creation Wizard, supporting filings for all national jurisdictions, as well as WIPO, CTM, ARIPO, OAPI and extension registrations. You can also create TM families from multiple jurisdictions all at once.

Patent Module

Maximize the efficiency of your patent management for all kinds of filings - National, EP, ARIPO, OAPI, EAPO, GCC, PCT National Phase, and National Continuation applications. This module includes Invention support and Patent Family information, Patent Creation Wizard, and Prior-Art Search feature (for patent and non-patent literature). Multiple inventions can also be linked to a patent family.

Design Module

Manage your design families easier than ever before. From a design profile, you can set up all subsequent applications with the Design Creation Wizard, enabling easier filings and multiple design applications for national jurisdictions, international Hague Designs, European Designs, ARIPO or OAPI, as well as extension registrations. The integrated image viewer makes design management fast and easy.

Matter Module

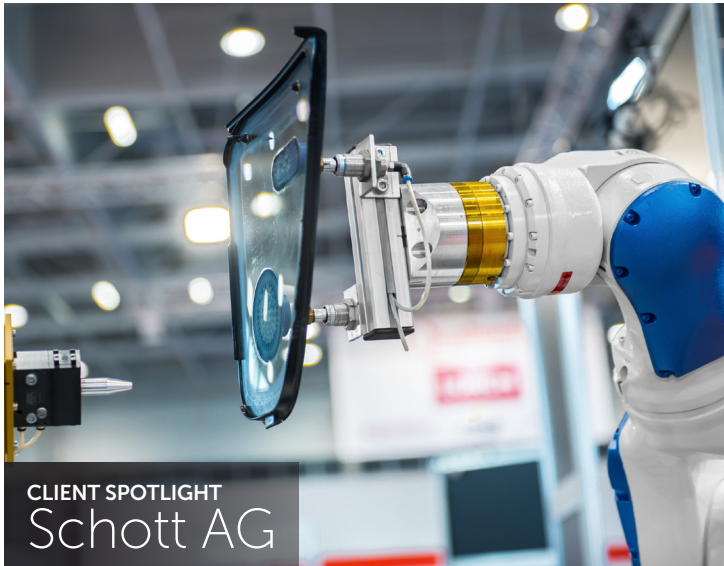

Have all information related to a case in one place. Link agreements, licenses, oppositions, domains, records, searches, litigation, infringements or cancellation /

invalidity actions to other IP assets. You can also manage competitive intelligence data by saving it as third party information.

Hosting options available

Get unparalleled security and reliability by hosting your DIAMS iQ installation at Dennemeyer. Our redundant server infrastructure comprises multiple data centers to ensure highest availability. The servers are regularly tested for vulnerabilities and monitored for maximum security and integrity.

Dennemeyer has successfully implemented and maintains an Information Security Management System (ISMS) fulfilling the requirements of ISO27001.

Over the years we remained in regular contact with Dennemeyer's team, who helped us with various tasks: from sending periodical updates and useful country law information, to Helpdesk services and IT assistance.

What we like best about our cooperation with Dennemeyer during the last 17 years is their friendliness and dedicated assistance, accompanied by very short response time and their excellent competence in the areas of IT and intellectual property.

The reliability of their service and the continuous support made the decision of switching to DIAMS iQ quite logical.

Wolfgang Wentzel, Head of Trademark Department

We were searching for a robust software solution that would be capable of successfully addressing our need to manage Hugo Boss' trademark and design portfolios. We recognized in DIAMS iQ a system that would allow our team to autonomously handle our portfolios in a flexible and user-friendly way.

Additionally, iQ's compatibility with our existing IT infrastructure and its docketing capabilities enable us to easily keep track of the procedures and deadlines.

Judith Eckl, General Counsel
